Acknowledgments

The Canadian Forest Service, Forest Renewal British Columbia and the BC Ministry of Forests provided funding for this project. The project was delivered in cooperation with the following groups.

BC Wood Specialties Group
Canadian Plywood Association
BC Council of Value Added Wood Processors
Central Interior Wood Processors' Association
Interior Value Added Wood Association
Independent Lumber Remanufacturers' Association
Vancouver Island Association of Wood Processors
BC Log Building Industry Association
Kootenay Wood Vine

Canadian Forest Service
BC Ministry of Forests
BC Ministry of Employment & Investment
Forest Renewal BC
Forintek Canada Corp.

The willingness of the many BC companies to take the time to complete the survey and to share information on their business is the ingredient that makes this research possible. These are particularly challenging times for most forest products companies and the cooperation on this project is appreciated.

The authors are particularly grateful for the cooperation and support provided by Louise Wilson, Bob Holm, John Talbot, Mark Shepherd, Joan Easton, and Dave Shaw.

INTRODUCTION

The information that was used to prepare this directory was assembled as part of a project to examine the structure and significance of secondary manufacturing in the British Columbia forest industry. Based on the primary data gathered via an industry survey for this project it is estimated that in 1997 BC secondary manufacturing generated 19,500 direct jobs and $3.87 billion in sales. This estimation is based on a definition of secondary manufacturing which includes the following business types: remanufacturing, millwork, engineered wood products, cabinets, furniture, pallets & containers, panel products, shakes & shingles, and other wood products.

The Directory of Secondary Manufacturing of Wood Products in British Columbia was completed to support the market development efforts of the BC industry. The forest products sector is increasingly competitive and improved information reduces the risk associated with market development efforts.

In order to complete this directory an inventory of BC secondary manufacturing companies was developed gathering names from various industry associations, and from private and public listings. Companies in this inventory were requested to complete a questionnaire.

Not all BC companies involved in secondary manufacturing of wood products are included in this directory. Some companies elected not to respond to requests to participate and to provide company information. Others, despite a concerted effort to develop a comprehensive company listing, may have been missed.

Another report completed as part of this project provides a detailed analysis of the structure and significance of secondary manufacturing in BC. The report, titled ***An Examination of Secondary Manufacturing in British Columbia: Structure, Significance and Trends*** (Working Paper 99.02) by B. Wilson, B. Stennes and S.Wang, is also available from the Pacific Forestry Centre, Canadian Forest Service.

HOW TO USE THIS DIRECTORY

Company Listing

This section consists of an alphabetical listing of the companies included in the directory. Each company is identified by name, the company address is provided and the company is classified by business type. The business type classification is based on the company's major product by sales value. Each company is cross-referenced with the company profile page.

Product Listing

This section, in a yellow pages format, lists the companies under a selection of products.

Company Profiles

This section, sorted by business type, contains individual company profiles. Each company profile provides the complete company address, a contact name, and information on products manufactured, species used and markets.
